3D Product Renders

The Sugarsweet Company was inspired by the Japanese Ramune company Shirakiku and its iconic Ramune beverages. Initially, the project launched with a product-centric website, leveraging the dynamic animations of GSAP to capture the flavors and fun of Sugarsweet. As the project evolved, so did the website, transforming into an e-commerce platform. This new iteration allowed for interactive user experiences, such as adding products to a cart and overseeing inventory. This upgrade was forged with Node.js, MongoDB, Express.js, and Handlebars, crafting an online portal that not only showcased the Sugarsweet Company's offerings but also mirrored the meticulous management of its digital storefront.
